About Safe Cum

SafeCum is a revolutionary platform built to host adult content and to connect creators and consumers, easily, safely and fairly. Through removing the middleman and adopting a decentralized approach to running the SafeCum platform, our goal is to provide high quality content and boost creativity and innovation.

The platform itself is currently being developed to include a vast array of content for all tastes, and brought to you by different creators. Creators will also be rewarded fairly through having their content be tokenized into NFTs, while the NFTs themselves will be able to be traded on the platform itself.
